PROFESSIONAL SUMMARY

Results-driven MCA Graduate and Software Developer with hands-on experience at Breakthru.ai across Data Engineering, AI Integration, and Full-Stack Web Development. Proficient in Python, SQL, Flask, REST APIs, HTML, CSS, JavaScript, Git, and GitHub. Built Rowboat, an open-source AI coworker powered by LLMs, Model Context Protocol (MCP), Gmail API, and Markdown knowledge graphs, reducing repetitive knowledge work by over 60%. Earned 3 Databricks certifications and a Claude Code in Action certification from Anthropic. Completed 14+ certifications from Databricks, AWS, IBM, Infosys, Deloitte, and Tata Group. Immediate joiner.

TECHNICAL SKILLS

Programming: Python, JavaScript, SQL, HTML, CSS, Node.js, Java

AI and LLM: LLMs (OpenAI, Claude, Ollama), Model Context Protocol (MCP), Prompt Engineering, NLP

Frameworks & APIs: Flask, REST APIs, Gmail API, Fireflies.ai, Pandas, NumPy, MQTT

Data Engineering: Databricks, Apache Spark, Delta Lake, ETL Pipelines, Data Cleaning, Data Visualization

Databases: MySQL, MongoDB, PostgreSQL, Markdown Knowledge Graphs

Cloud & DevOps: AWS (EC2, S3), Databricks Cloud, Git, GitHub, Docker, CI/CD

Tools & Concepts: VS Code, Claude Code, Android Development, MS Office 365, Kali Linux, Agile, OOP, Knowledge Graphs

EDUCATION

Master of Computer Applications (MCA) – Completed 2026

M.P. Nachimuthu M. Jaganathanan Engineering College, Chennimalai, Erode | Anna University | 2024 – 2026 | 83%

Bachelor of Computer Applications (BCA)

Loyola College of Arts and Science, Mettala | Periyar University | 2021 – 2024 | 79%

Higher Secondary Certificate (HSC)

T.P.P Government Higher Secondary School, Manali Jaderpalayam | Tamil Nadu State Board | 2020 – 2021 | 75%

Secondary School Leaving Certificate (SSLC)

Government High School, Illupili | Tamil Nadu State Board | 2018 – 2019 | 60%

WORK EXPERIENCE

Software Developer

Breakthru Enterprise Solutions Pvt. Ltd. (breakthru.ai) | Coimbatore, Tamil Nadu | January 2026 – Present

- Architected and deployed 3+ ETL pipelines to extract, transform, and load structured datasets using Python and SQL, reducing manual data processing effort by approximately 30%.
- Improved data quality across 5+ enterprise datasets by performing systematic cleaning, transformation, and validation, cutting error rates by over 20% for downstream analytics teams.
- Developed and maintained enterprise AI integrations including MCP Server, Sakthi GPT, and Visitor/Farm Management Systems using Python, Flask, REST APIs, and modern web technologies.
- Contributed to Java-based Android application development with real-time GPS tracking and MQTT-based location workflows.
- Contributed to agile sprints with a team of 5+ engineers, delivering pipeline enhancements on schedule and maintaining 100% version-controlled commits on GitHub.

Web Development Intern

Master Mind Techno Solutions | Salem, Tamil Nadu | July 2024 – August 2024

- Delivered 5+ fully responsive web pages using HTML, CSS, and JavaScript, achieving cross-browser compatibility across 3 major browsers and improving page load consistency.
- Resolved 10+ UI bugs and implemented form validation improvements in collaboration with senior developers, completing all sprint tasks 100% on time across a 4-week engagement.

COMPANY PROJECTS (BREAKTHRU ENTERPRISE SOLUTIONS PVT. LTD.)

MCP Server – Internal Enterprise AI Integration

- Developed an internal MCP Server for standardized integration between AI applications and enterprise tools.
- Worked on MCP-based tool integration, REST API connectivity, and Docker-based containerized workflows.

TRAMS – Application Enhancement

- Contributed to UI development and web application enhancements.
- Assisted in improving application workflows and interface components.

Sakthi GPT – Enterprise AI-Powered GPT Application

- Contributed to the development of an enterprise AI-powered GPT application.
- Worked on UI implementation, application workflows, and AI integration.

Visitor Management System (VMS)

- Contributed to dashboard development, UI components, and visitor workflow functionality.
- Worked with Python and REST API-based application features.

Farm Management System (FMS / Vivasaya)

- Contributed to application workflows, web pages, and UI components for farm management operations.
- Supported REST API-based application functionality.

Route Tracking Mobile Application

- Contributed to the development of a Java-based Android application for real-time GPS route tracking.
- Implemented MQTT-based location tracking, check-in/check-out workflows, REST API integration, and PostgreSQL-backed route tracking functionality.

PERSONAL PROJECTS

Rowboat – Open-Source AI Coworker with Knowledge Graph | 2025 – 2026

Tech Stack: Python, Node.js, LLMs (OpenAI, Claude, Ollama), MCP, Gmail API, Fireflies.ai, Markdown KB, Git, GitHub

- Engineered an open-source AI coworker that ingests data from 4+ sources (emails, meeting notes, voice memos, documents) and builds a persistent Markdown knowledge graph, reducing context retrieval time by over 60% compared to stateless AI tools.
- Integrated Gmail API and Fireflies.ai for zero-touch data ingestion; built a 3-model LLM pipeline (OpenAI, Claude, Ollama) that auto-generates email drafts, meeting briefs, and daily plans, cutting manual knowledge work by 60%+.
- Adopted Model Context Protocol (MCP) for standardized tool integration across 5+ connectors with no vendor lock-in; achieved 100% data portability through version-controllable Markdown files hosted on GitHub.

Price Comparison Browser Extension | January 2024 – April 2024

Tech Stack: Python, Flask, REST API, Web Scraping, HTML, CSS, MySQL, Git, GitHub

- Developed a Python and Flask browser extension with 3 REST API endpoints to compare prices across 2 major e-commerce platforms (Amazon and Flipkart) in real time, reducing manual search time by 70%.
- Designed a normalized MySQL schema with 4+ tables for persistent product storage, supporting 1,000+ product comparisons; maintained complete version control on GitHub with 20+ structured commits.

CERTIFICATIONS

- Databricks Certified Data Engineer Professional | Databricks Certified Data Engineer Associate | Databricks Certified Data Analyst Associate – Databricks
- Claude Code in Action – Anthropic
- AWS Solutions Architecture Job Simulation – Forage | Data Analytics – Deloitte Australia via Forage | Data Visualisation – Tata Group via Forage
- Cyber Security Bootcamp – Novi Tech Pvt. Ltd. | Cyber Security Basics – Naan Mudhalvan
- Cloud Computing, Deep Learning, Data Science, SQL and Databases – IBM Cognitive Class
- AI Fundamentals, NLP, Computer Vision, Prompt Engineering, Ethical AI, AI-First Software Engineering – Infosys Springboard
- Microsoft Office 365 Advanced Suite | Intro to Git and GitHub | Digital Literacy – NIELIT

ACHIEVEMENTS

- Earned 3 Databricks certifications (Data Engineer Professional, Associate, and Data Analyst Associate) from a total of 14+ across Databricks, Anthropic, AWS, IBM, Infosys, Deloitte, and Tata Group – rare for a fresh graduate.
- Built Rowboat, an open-source AI coworker that cut knowledge work by 60%+ by integrating LLMs and MCP – a production-level project demonstrating advanced engineering beyond standard coursework.
- Developed and delivered 6 enterprise-grade applications at Breakthru.ai including AI integrations, management systems, and a mobile tracking application.
- Maintained 83% in MCA and 79% in BCA; published 2 major projects on GitHub with full documentation and version history.
